

Aluminium Ammonium Sulphate

สารส้มใส

1.Basic info:

Synonyms:aluminum ammonium sulphate;ammonium alum

CAS: 7784-26-1

EINECS: 232-055-3

M.F:AlH₂8NO₂OS₂

M.W:453.33

Standard: HG2917-1999

Appearance: Colorless and transparent cubic crystals or white granular powder.

2.Specification:

Item	Index
Aluminium ammonium sulphate	98% - 99.5%min
Fe	0.05%max
Pb	0.0005%max
As	0.0002%max
Water insoluble matter	0.1%max
Appearance	White lumps or powder
Weightless when drying	1.0%max

3.Properties:colorless glassy octahedral crystal to white granules or powder, odorless and slightly sweet, strong convergence.

4.Uses: processing of baking powder, fried food, salted jellyfish, vermicelli processing, crispness and color preservation of fresh fruits and vegetables, water purification, disinfection, rubber processing, leather, processing of washing powder, feed processing, pencil production,water treatment.

5.Features: high brightness, high fineness, high quality, no agglomeration for long time.

6.Packing: Packing 50kg 25kg plastic; For export: following your demands (plastic bag lined woven bag)
